stimulant - 44 € / gram

Cocaine

Cocaine is a powerfully addictive stimulant drug made from the leaves of the coca plant native to South America. As a street drug, cocaine looks like a fine, white, crystal powder. Street dealers often mix it with things like cornstarch, talcum powder, or flour to increase profits.

Small amounts of cocaine usually make the user feel euphoric, energetic, talkative, mentally alert, and hypersensitive to sight, sound, and touch.

hallucinogen - 10 € / dose

LSD

LSD is one of the most powerful mood-changing chemicals. It is a clear or white odorless material made from lysergic acid, which is found in a fungus that grows on rye and other grains. LSD has many other names, including Acid, Blotter, Dots, and Yellow Sunshine.

The user may experience extreme changes in mood, or swing rapidly from one emotion to another. The drug produces delusions and visual hallucinations.

opioid - 15 € / dose

Heroin

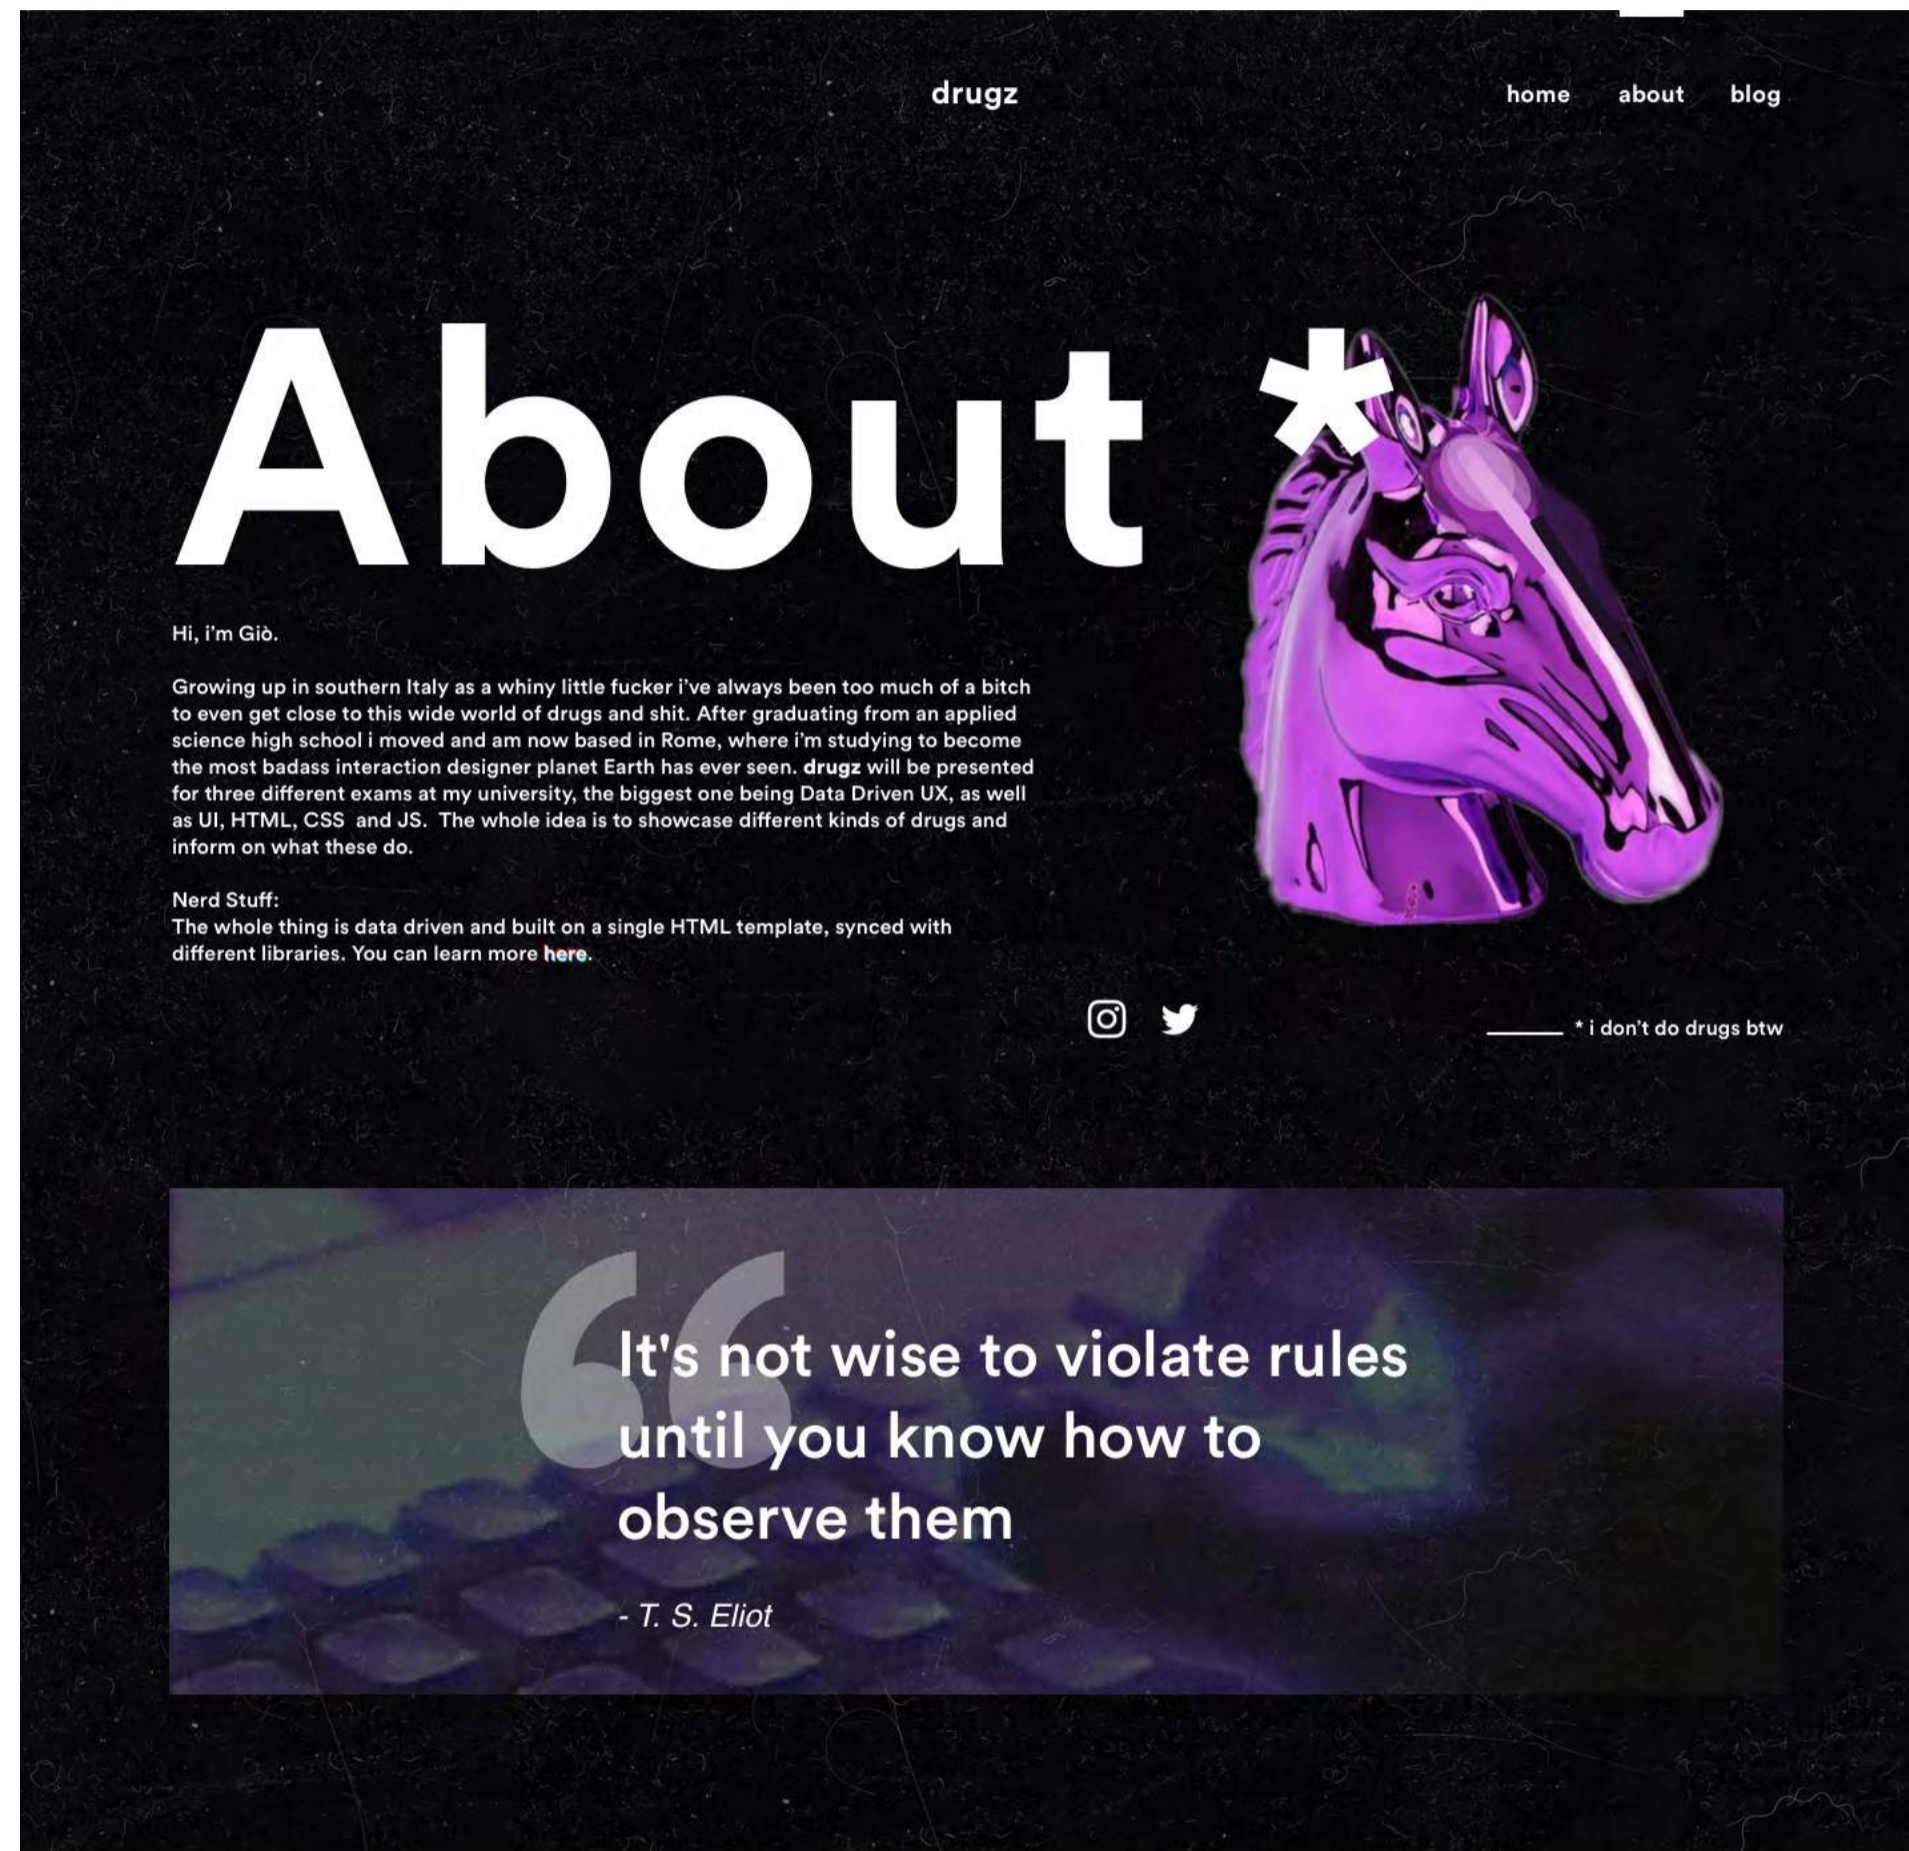

Heroin is an opioid drug made from morphine, a natural substance taken from the seed pod of the various opium poppy plant. Heroin can be a white or brown powder, or a black sticky substance known as black tar heroin. Other common names for heroin include big H, horse, and smack.

People who use heroin report feeling a surge of pleasure, or euphoria. However, there are other common effects, including dry mouth, severe itching and heavy feeling in the arms

LSD

LSD - Lysergic acid diethylamide

LSD is an illegal, semi-synthetic drug that combines natural and man-made substances. It is derived from ergot, a fungus that grows on certain grains, and a non-organic chemical called diethylamide.

Physical stimulation resulting from LSD use causes the pupils to dilate, and blood pressure, heart rate, and temperature to rise.

Users of LSD talk about good or bad "trips," or experiences. A "bad trip," is like a living nightmare. It is similar to psychosis, and the person cannot escape from it. There may be extreme fear, paranoia, a separation from self, and the person may believe that they are dying or in hell.

Tolerance, or a need to increase the dose to achieve the desired response, happens quickly. If a specific dose is taken every day for 3 consecutive days, by the third day no reaction will occur.

One of the dangers is that LSD can trigger a long-term psychotic state or induce schizophrenia in susceptible individuals.

Flashbacks, also known as hallucinogen persisting perception disorder (HPPD), and severe disorientation can happen after only one dose.

The reasons for this are unknown.

L'amore per l'armonia e la bellezza è nato dentro di me molto tempo fa ma gli studi classici e poi di psicologia hanno probabilmente segnato la traccia di quello che sarebbe stato il mio percorso: il culto della bellezza, la mia sensibilità e la passione per l'artigianalità hanno trovato nel mondo del beauty il loro canale espressivo.

Plot

Deep within Montana's Mountains

A narrative adventure set in the early 90s, The Suicide of Rachel Foster takes place inside an eerily decaying family hotel. Nicole Wilson's family has been torn apart when she was little by her father's past actions, having a creepy affair with 16-year old Rachel Foster, which led to her taking her own life while nine weeks pregnant. Reading through your mother's handwriting notes left for you from her deathbed, she implores you to return to The Timberland Hotel and assess its current condition and sell it. With your father's passing, the hotel is the last haunting memory from your childhood and a man you grew to despise most in this world.

Characters

Rachel
Is she really dead? I dont know as I didnt play the game yet but something tells me I won't find out even after completing the main story. Really wanna know tho.

Nicole
Just the protagonist doing whatever protagonists do: walk through rooms and find out amazing new outcomes that make the story different.

Irving
Although the only person in the hotel, you are not alone, thanks to an early cell phone prototype that provides a direct line to a FEMA agent named Irving.

Reviews

9/10

The digital fix

The game knows exactly how to manipulate emotions and does so throughout. Equal parts intriguing, frightening, disturbing, and thrilling. The Suicide of Rachel Foster sets a new high-bar for the already strong first person exploration genre.

8.5/10

The games machine

The Suicide of Rachel Foster is a fascinating interactive thriller that manages to treat extremely delicate issues such as suicide, depression, and love with extraordinary tact.
